finish.

PercoTop® 9600

The versatile
medium solids
coating for a
durable finish.

At Axalta Coating Systems we know the commercial vehicle market. Some customers want the greater quality provided by a medium solids system. Others don't have to operate to strict VOC legislation. That's why we developed PercoTop® 9600. It's a medium-solids polyurethane solventborne topcoat specifically formulated for OEM commercial vehicle and trailer manufacturers. In fact, PercoTop® 9600 is the right choice for any large commercial vehicle that needs a durable finish.

PercoTop® 9600, a two-component solventborne topcoat, achieves its high-gloss appearance in two coats. A wide range of activators and thinners suited to various equipment and climatic conditions ensure optimum results every time.

And PercoTop® 9600 also has good flow, dries quickly and delivers excellent long-term colour and gloss retention.

For convenience, PercoTop® 9600 is available either as a factory package or a complete product line consisting of durable PercoTop® tints and a specialist binder. The tints and binder concept allows the mixing of any topcoat colour on demand. Existing colours can quickly be reproduced with complete accuracy. PercoTop® 9600 can also deliver a wide range of gloss levels, from matt to high gloss, with ease. Simply replace the high-gloss binder CS960 with the flat binder CS979 to get the required gloss level.

With our end-users in mind, we have formulated PercoTop® 9600 to suit conventional, HVLP and high-pressure spray equipment.

For the ultimate in flexibility, VOC compliance can be achieved simply by using PercoTop® 9700 HS, there is no need to switch mixing tints.

PercoTop® 9600 - the perfect finish with maximum flexibility.

Highlights

- 2K medium solid polyurethane quality
- Good flow
- High-gloss finish
- Various gloss levels available
- Easy to apply
- Fast drying
- Wide colour availability
- Excellent mechanical properties
- Robust chemical and weather resistance
- Adaptable to a VOC-compliant quality
