

Company Quality Policy Statement

The Quality Management system of the company operates to the requirements of EN ISO 9001:2008

Protega Paints is a market leader in the manufacture of Industrial Coatings. The nature of the Company's activities is dependent on our experience, expertise and capability to maintain the quality, performance, reliability, durability and aesthetics of our products with due regard to their safe handling and use for employees, customers and the environment

The objective of the management of Protega Paints is to provide its products in a manner which conforms to the specified quality procedures of the Company, its Customers and the systems and regulations of all applicable authorities.

In order to achieve this objective we are committed to establishing and maintaining an effective and efficient management system planned and developed to comply with ISO 9001:2008. Within our management functions we will strive for continuous improvement of the quality management systems and our products and procedures. The training and advancement of staff in all areas is our aim.

Quality objectives and performance targets are defined for departments and the company as a whole. Objectives are measured results are published and revised regularly and are reviewed by management, and adjusted, at least annually to drive improvements forward. The elimination of waste at all levels is key to the companies aim.

Protega Paints will strive to continuously improve our customers satisfaction by continuing to develop and supply products that are meet or exceed our customers needs now and in the future.

Protega Paints will ensure that all staff are fully conversant with the company objectives and procedures through an ongoing training and education programme at all levels within the company.

A copy of this Quality Policy Statement is displayed on all notice boards and via the company Intranet. New employees receive a copy at the time of their induction and are instructed in its importance. The quality policy is reviewed annually as part of the internal quality auditing system.
